

Dear Subcontractor,

Pogue Construction has hired ProQual, a division of Assurance Screening, LLC, to streamline our insurance verification process, as well as, other portions of our subcontractor credentialing, which has the ability to do a much more thorough process.

When working with Pogue, you will receive communication from ProQual concerning completing the required registration and screening process. This screening will include basic information concerning your company which will then be verified by ProQual. This information gathering will encompass items such as civil public records searches, insurance certificate collections and verification, and verification of trade licenses, if applicable.

All verification information will be compiled into a single report, which can be accessed at any time from your company login, once registration is complete. Visit [proqualverified.com](http://proqualverified.com) and select "Subcontractor/Vendor" login to access your account.

At Pogue Construction, we realize that you are a very important part of our team, and that our continued success depends on you. Thank you for your interest in working with Pogue Construction.

Please do not hesitate to contact us with any questions.

Sincerely,

Ben Pogue

President & CEO
